

Operator Training Terms & Conditions

1. Vehicle

- 1.1 Must be in good working order and conform to current legislation.
- 1.2 Boom Height Indicator must be operational.
- 1.3 PTO engagement indicator and interlock must be operational.
- 1.4 Vehicle must be available throughout the training session.

2. Loader

- 2.1 Must be in good working order.
- 2.2 Must have a current Report of Thorough Examination, a copy of which must be provided before training commences.
- 2.3 All safety features must be operational and conform to current legislation.
- 2.4 Must be fitted with the correct attachment for the type of training required.
- 2.5 Must have the manufacturer's Operator Manual.
- 2.6 The maximum rated capacity of the loader used for training will determine the size of loader the operator will be certificated to use, assuming all assessments are passed successfully. For this reason, it should be ensured that the loader set aside for training falls into the ALLMI category that the operator wishes to be licensed for. If you are not familiar with the ALLMI categories system, then please contact us.
- 2.7 Spreader pads of sufficient size / strength must be available.

3. Lifting Accessories / Attachments

- 3.1 All lifting accessories / attachments must be in good condition.
- 3.2 Lifting accessories / attachments must be appropriate for the type of load being lifted.
- 3.3 Lifting accessories / attachments must have a current Report of Thorough Examination, a copy of which will be required before training commences.
- 3.4 All lifting accessories / attachments must have rated capacity information attached.

4. Working Area

- 4.1 A working area equivalent to the loader's maximum reach throughout its full slewing range, plus two metres, must be provided.
- 4.2 The working area must be cordoned off. No other persons apart from the instructor and candidates should be in this area.
- 4.3 The area should be firm, level and free from obstructions (overhead power lines, buildings, underground services, etc).
- 4.4 Loads to be manoeuvred must be in this area before the practical session begins.

5. Classroom

- 5.1 A classroom, dedicated to training, must be provided, which should comfortably accommodate seating the required number of candidates and instructor, as well as an ALLMI auditor. The classroom must have adequate heating / ventilation, lighting and power points.
